

Your Health

Birth Control Counseling:

Everyone benefits from making a plan about when and if they want children. We are here to help you with your decision.

STI Screening:

Get tested for Sexually Transmitted Infections (STI). Learn about prevention and regular screening. Treatment is available.

Why is this important ?

- Get the facts about what works and what doesn't to avoid STI's and pregnancy.
- Many STI's have no symptoms so getting tested is important.
- Learn more about your body and how it works because knowledge is power.
- We value the men in our communities; we have men's health visits available.

About our Services

Birth Control and Options Counseling

Do you want to avoid unplanned pregnancy?

Talk to your health care provider about birth control options. We can help you choose a method that is best for you and your partner. All methods are available.

STI Testing

Tests and treatment are available for sexually transmitted infections.

Pregnancy

Are you thinking about getting pregnant?

Let us guide you towards and through a healthy pregnancy.

Cancer Screening:

1. **Pap Smears** are recommended every three years. Pap smears look for abnormal changes in the cells of your cervix. This allows us to find and treat changes so they do not become cancer.

2. **HPV Testing & HPV Vaccination**

We offer tests for the viruses that can cause cervical cancer as well as vaccines to protect you from getting the virus.

3. **Mammogram Referral & Breast Cancer Awareness**
Early detection of breast cancer.

Nutritional Counseling

A registered dietitian helps individuals to achieve a healthy and balanced diet. Ask your health care provider for more information.

Well Women & Men Care

This is a time to ask your provider the questions you have always wondered about and figure out what screening you may need.

Infertility Evaluation

Services are available for people who are having a hard time getting pregnant.

Women's Health Gynecologists are available

Appointments are available for help with complex gynecological need.

Counseling Services for Emotional Well-being

Services are available to help with stress, depression, anxiety, relationship issues, addiction, grief, parenting concerns, mood disorders and other concerns. Ask your health care provider for more information.
